# C50V

## Portable Full Digital Color Doppler Ultrasound System

C50v is based on WellD newly upgraded ultrasound platform with improved image quality, applies to various scenes of ultrasound diagnosis, such as routine exams/ public health check up system/ health screening/ emergency treatment and so on. Its clearer image ability with cost effective price satisfies the demands of basic medical services, and benefits more people.

Excellent Image · Benefit Everyone

- ▶ **14 Inches high resolution LCD screen**  
Multi-angle adjustable for screen wide view
- ▶ **Internal lithium battery**  
Satisfy movement scene of diagnosis
- ▶ **Three probe ports**  
Support probes hot swapping
- ▶ **Considerate keys layout**  
Accord with ergonomics for more comfortable operation

### Leading Technology

- 
**Multi-focus transmission, Auto focusing**  
Auto focusing technology largely improved imaging precision
- 
**Mc clear speckle noise suppress technology**  
Removes the speckle noise in ultrasound images efficiently, and brings clearer diagnostic images
- 
**Pulse inversion harmonic imaging technology**  
All probes support PHI technology
- 
**Patients report images and text management system**
- 
**Professional presetting**
- 
**Abundant measurement software**
