## LEADING TECHNOLOGY, EXCELLENT IMAGING

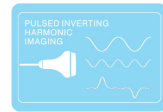

Automatic identification  
of probe interface

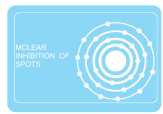

Synthetic aperture beam-  
forming technology (SA)

Multi-beam parallel  
processing technology

Pulse Inversion Harmonic  
Imaging Technology (PHI)

Speckle Noise  
Suppression Technology

Precise Transmit  
Focus Technology

## Optional probes

Convex probes

Linear probes

Microconvex probe

Animal rectal probe

Back-fat probe

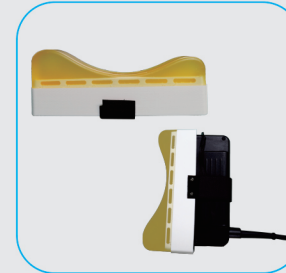

## Light

1.65KG Only  
Equipped with Leather bag

## Easy operation

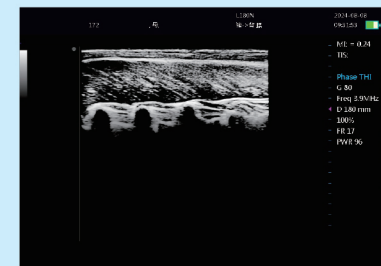

Internal lithium battery, working time over 3 hours  
Support wireless images transmission

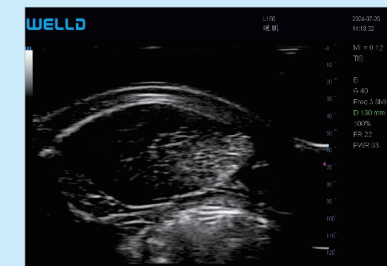

Stand-pad for back fat

## + Clear Diagnostic Images

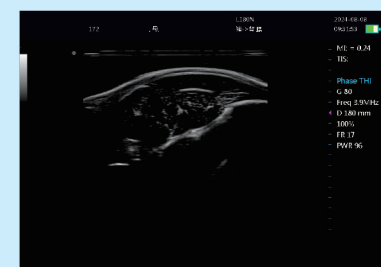

"Mimage" Latest core technology embedded

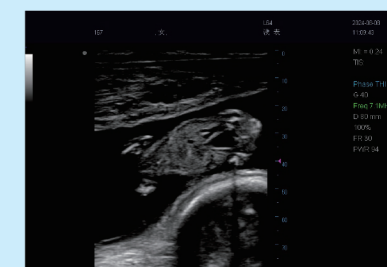

Back fat

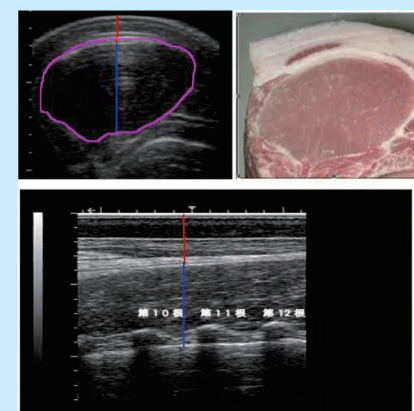

Beef ribeye

Pig loineye

Early pregnancy

Follicles
